- Up to 4 times more stable than conventional algal DHA
- Undetectable contaminant levels
- 100% non-animal, suitable for vegans
- Highly sustainable
- 2+ year shelf life
- Allergen-free

Consumers of Omega-3 ingredients are more savvy than ever. And they want it all. Great organoleptics. Great nutrition and a wide range of 'life choice' features. Sustainability. Non-animal. **True** non-GMO. Solvent-free. High purity levels...and more.

New élantria Algal DHA delivers all of these in a premium ingredient that features best-in-class solutions at every step of the cultivation, processing and stabilization process – delivering uncompromising quality to your customers.

BUILD TRUST WITH YOUR CUSTOMERS WITH A PREMIUM QUALITY ALGAL DHA

élantria Algal DHA is produced from non-GMO microalgae *Schizochytrium sp* – one of the most concentrated non-animal sources of the compound. It is refined, deodorized and stabilized at state-of-the-art facilities in France under the strictest quality control procedures. This includes a clean, enzymatic extraction process that is solvent-free. élantria Algal DHA delivers 40% and 60% DHA by weight in a non-GMO, non-concentrated form.

Truly non-GMO

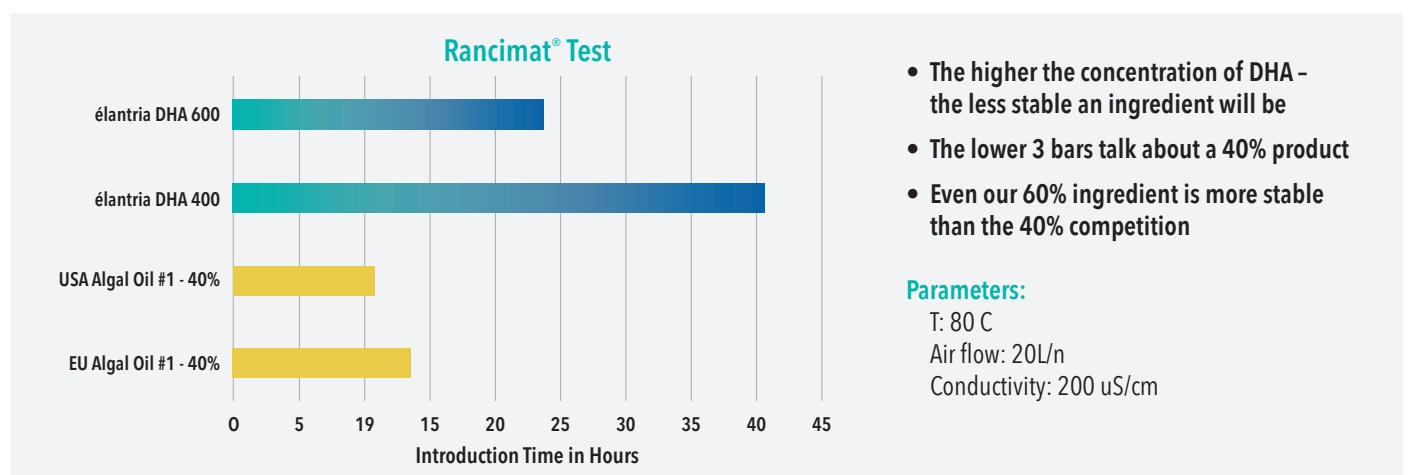

With élantria Algal DHA, you can be assured you're offering a true non-GMO ingredient. élantria microalgae is non-GMO to start with. But just as importantly, it is fed by non-GMO feedstocks.

Innovative stabilization is key to product quality

Algal oils rich in DHA are known to be very sensitive to oxidation – which can detract from both nutritional and organoleptic properties of an ingredient. élantria is stabilized using the Quality Silver® process – which both inhibits the onset of oxidation and prevents the oxidative cascade. This approach ensures a high-quality ingredient with a long shelf life – now guaranteed at over 2 years.

élantria Algal DHA via Quality Silver is more than up to 4x more stable than conventional algal oils

With élantria Algal DHA, you can promise your customers everything they want in DHA supplementation – and then deliver.
